Summary of official.id [Desktop version] Website Security Test

Provided "as is" without any warranty of any kind.

official.id was tested 8 times during the last 12 months.

Your final score:

A | B | C | F

A

Date/Time:	Mar 1st, 2026 11:10 GMT+0
Server IP:	216.198.79.1
Reverse DNS:	-
Location:	Mount Hope, United States
Version:	for desktop

Executive Summary - official.id

Web Software item detected; it appears to be outdated, but no known vulnerabilities were detected. No Software was identified. Detected Software Component includes react. Show details.

No obvious GDPR-related compliance issues were detected across Privacy Policy, Website Security, TLS Encryption, Cookie Protection, Cookie Disclaimer. The following checks were not performed, as no corresponding cookies with personal or tracking information seem to be sent by the website: Cookie Protection, Cookie Disclaimer. Show details.

The website is compliant with PCI DSS Requirement 6.3, while being non-compliant with Requirement 6.4. Show details.

Issues were identified with key security header misconfigured Content-Security-Policy. Optional HTTP headers appear to be properly configured: Server, Permissions-Policy, Referrer-Policy, Cache-Control. Show details.

Content-Security-Policy is enforced but configuration issues were identified: overly permissive directives, directive errors. A report-only Content-Security-Policy is not present. Show details.

No cookies were detected. Show details.

Web Software Security Test

Web Software Found	Web Software Outdated	Web Software Vulnerabilities
1	1	0

The following security vulnerabilities are known to be present in the fingerprinted version of web software. To run a comprehensive vulnerability scan of your web application, please use ImmuniWeb® Neuron.

Fingerprinted Software & Vulnerabilities

No CMS were fingerprinted on the website.	Information

Fingerprinted Software Components & Vulnerabilities

React 19.2.0-canary-3fbfb9ba-20250409

The component is outdated. No known security vulnerabilities found. Update to the most recent version **19.2.4**.

GDPR Compliance Test

If the website processes or stores personal data of the EU residents, the following requirements of EU GDPR may apply:

PRIVACY POLICY

Privacy Policy was found on the website.	Good configuration

WEBSITE SECURITY

No publicly known vulnerabilities were found in the website CMS or its components.	Good configuration

TLS ENCRYPTION

HTTPS encryption is present on the web server.	Good configuration

COOKIE PROTECTION

No cookies with personal or tracking information seem to be sent.	Information

COOKIE DISCLAIMER

No third-party cookies or cookies with tracking information seem to be sent.	Information

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com
Copyright © 2025 ImmuniWeb SA

PCI DSS Compliance Test

If the website falls into a CDE (Cardholder Data Environment) scope, the following Requirements of PCI DSS may apply:

REQUIREMENT 6.3

No publicly known vulnerabilities seem to be present in the fingerprinted versions of the website CMS and its components.	Good configuration

REQUIREMENT 6.4

No WAF was detected on the website. Implement a WAF to protect the website against common web attacks.	Misconfiguration or weakness

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com

HTTP Headers Security Test

Some HTTP headers related to security and privacy are missing or misconfigured.	Misconfiguration or weakness

MISSING OPTIONAL HTTP HEADERS

Access-Control-Allow-Origin

SERVER

Web server does not disclose its version.	Good configuration

Raw HTTP Header

```
Server: Vercel
```

STRICT-TRANSPORT-SECURITY (HSTS)

The header is properly set.	Good configuration

Raw HTTP Header

```
Strict-Transport-Security: max-age=63072000; includeSubDomains; preload
```

Directives

Name	Description	Alerts
max-age	Sets the time browsers must enforce the use of HTTPS to browse the website.	No problems found

X-FRAME-OPTIONS

The header is properly set.	Good configuration

Raw HTTP Header

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com
Copyright © 2025 ImmuniWeb SA

```
X-Frame-Options: SAMEORIGIN
```

X-CONTENT-TYPE-OPTIONS

The header is properly set.	Good configuration

Raw HTTP Header

```
X-Content-Type-Options: nosniff
```

PERMISSIONS-POLICY

The header is properly set.	Good configuration

Raw HTTP Header

```
Permissions-Policy: camera=(), microphone=(), geolocation=()
```

REFERRER-POLICY

The header is properly set.	Good configuration

Raw HTTP Header

```
Referrer-Policy: strict-origin-when-cross-origin
```

CACHE-CONTROL

The header is properly set.	Good configuration

Raw HTTP Header

```
Cache-Control: private, no-cache, no-store, max-age=0, must-revalidate
```

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com

Content Security Policy (CSP) Test

CONTENT-SECURITY-POLICY (CSP)

Content-Security Policy is enforced.	Good configuration
Some directives have values that are too permissive.	Misconfiguration or weakness
Some directives contain errors.	Misconfiguration or weakness

Raw HTTP Header

```
Content-Security-Policy: default-src 'self'; script-src 'self' 'unsafe-eval' 'unsafe-inline' https://apis.google.com; style-src 'self' 'unsafe-inline' https://fonts.googleapis.com; img-src 'self' data: https: blob:; font-src 'self' https://fonts.gstatic.com; connect-src 'self' https:; ;
```

Directives

Name	Description	Alerts
default-src	The default-src directive serves as a fallback for the other fetch directives. 'self' - Keyword is OK	No problems found
script-src	Restricts the locations from which scripts may be executed. Host whitelists can frequently be bypassed. Consider using 'strict-dynamic' in combination with CSP nonces or hashes. 'self' - 'self' can be problematic if you host JSONP, Angular or user uploaded files. 'unsafe-eval' - 'unsafe-eval' allows the execution of code injected into DOM APIs such as eval().	Requires your attention

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com

Copyright © 2025 ImmuniWeb SA

Name	Description	Alerts
	'unsafe-inline' - 'unsafe-inline' allows the execution of unsafe in-page scripts and event handlers. https://apis.google.com - apis.google.com is known to host JSONP endpoints which allow to bypass this CSP.	
style-src	Restricts the locations from which style may be applied to a Document. 'self' - Keyword is OK 'unsafe-inline' - Keyword is OK https://fonts.googleapis.com - URL is OK.	No problems found
img-src	Restricts the URLs from which image resources may be loaded. 'self' - Keyword is OK data: - Scheme is OK https: - Scheme is OK blob: - Scheme is OK	No problems found
font-src	Restricts the URLs from which font resources may be loaded. 'self' - Keyword is OK https://fonts.gstatic.com - URL is OK.	No problems found

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com
Copyright © 2025 ImmuniWeb SA

Name	Description	Alerts
connect-src	Controls requests which transmit or receive data from other origins using script interfaces. 'self' - Keyword is OK https: - Scheme is OK	No problems found
object-src	MISSING: Restricts the URLs from which plugin content may be loaded. Can you restrict object-src to 'none'?	Requires your attention
require-trusted-types-for	MISSING: The HTTP Content-Security-Policy (CSP) require-trusted-types-for Experimental directive instructs user agents to control the data passed to DOM XSS sink functions, like Element.innerHTML setter. Consider requiring Trusted Types for scripts to lock down DOM XSS injection sinks. You can do this by adding "require-trusted-types-for 'script'" to your policy.	Information

CONTENT-SECURITY-POLICY-REPORT-ONLY

The header was not sent by the server.	Information

Protection from Data Scraping Test

Many companies rely on AI bots to scrape website content, using the collected data to train their machine learning models. To safeguard information, website owners can apply different techniques to detect, limit, or block scraping activities carried out by these bots.

Robots.txt Rules	User-Agent Blocks	Meta Tags	Protection vs. Bots
0	0	0	0

Default Rules

The website has the following default access rules for all crawlers defined in robots.txt, unless overridden by more specific rules below.

User-agent: * Allow: / Disallow: /dashboard/ Disallow: /admin/ Disallow: /api/	Raw Value

GPTBot by OpenAI

Robots.txt Directives

No specific rule for GPTBot User-Agent(s) was found in robots.txt; default rules apply.	Information

Server-side Blocking

No server-side User-Agent-based blocking detected for GPTBot.	Information

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com
Copyright © 2025 ImmuniWeb SA

Gemini by Google

To control whether your website's content can be used to train Google's AI models (such as Gemini), Google follows the special Google-Extended User-Agent directive in your robots.txt file.

Robots.txt Directives

No rule is specified for the Google-Extended User-Agent, so Google imposes no restrictions on AI training and may use any content that its crawlers are allowed to access.	Information

However, Google-Extended does not crawl your site directly. Instead, it respects the access granted to other Google crawlers: Googlebot, Googlebot-Image, Googlebot-Video, Googlebot-News, GoogleOther, GoogleOther-Image, GoogleOther-Video.

No rule is specified for Google in robots.txt; default rules apply.	Information

Claude by Anthropic

Robots.txt Directives

No specific rule for ClaudeBot, Claude-User, Claude-SearchBot User-Agent(s) was found in robots.txt; default rules apply.	Information

Server-side Blocking

No server-side User-Agent-based blocking detected for ClaudeBot, Claude-User, Claude-SearchBot.	Information

Perplexity by Perplexity AI

Robots.txt Directives

No specific rule for PerplexityBot User-Agent(s) was found in robots.txt; default rules apply.	Information

Server-side Blocking

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com
Copyright © 2025 ImmuniWeb SA

No server-side User-Agent-based blocking detected for PerplexityBot, Perplexity-User.	Information

Copilot by Microsoft

Meta Tag Restrictions

No meta tag restricting usage of website's content found.	Information

Server-side Blocking

No server-side User-Agent-based blocking detected for Bingbot, BingPreview.	Information

DeepSeek by Hangzhou DeepSeek Artificial Intelligence

DeepSeek does not have public policy confirming that it will follow rules as defined in robots.txt. Use server-side blocking based on User-Agent to restrict access.

Server-side Blocking

No server-side User-Agent-based blocking detected for DeepSeekBot.	Information

Meta AI by Meta

Robots.txt Directives

No specific rule for Meta-ExternalAgent User-Agent(s) was found in robots.txt; default rules are ignored by this bot.	Information

Server-side Blocking

No server-side User-Agent-based blocking detected for Meta AI Crawler.	Information

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com
Copyright © 2025 ImmuniWeb SA

AmazonBot by Amazon

Robots.txt Directives

No specific rule for AmazonBot User-Agent(s) was found in robots.txt; default rules apply.	Information

Meta Tag Restrictions

No meta tag restricting usage of website's content found.	Information

Server-side Blocking

No server-side User-Agent-based blocking detected for Amazonbot.	Information

Apple Intelligence by Apple

To control whether your website's content can be used to train Apple's AI models (Apple Intelligence), Apple follows the special Applebot-Extended User-Agent directive in your robots.txt file.

Robots.txt Directives

No rule is specified for the Apple-Extended User-Agent, so Apple imposes no restrictions on AI training and may use any content that its crawlers are allowed to access.	Information

Applebot-Extended does not crawl your site directly. Instead, it respects the access granted to other Apple crawlers: Applebot. If no Applebot rule is present, Applebot follows the rules defined for Googlebot.

No rule is specified for Apple was found in robots.txt; general rules apply.	Information

Server-side Blocking

No server-side User-Agent-based blocking detected for Applebot.	Information

Doubao by ByteDance

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com
Copyright © 2025 ImmuniWeb SA

Doubao is an AI chatbot developed by ByteDance, the company behind TikTok. ByteDance operates the Bytespider web crawler, which may collect website content — potentially for training Doubao and other AI models. ByteDance does not have a public policy confirming that Bytespider will follow robots.txt rules. Use server-side blocking based on User-Agent to restrict access.

Server-side Blocking

No server-side User-Agent-based blocking detected for Bytespider.	Information

Custom Bot

A custom test crawler User-Agent used to check for simple keyword-based User-Agent blocks. Not associated with any real service and does not actually crawl the content on websites.

Server-side Blocking

No server-side User-Agent-based blocking detected for Custom Bot.	Information

This document is intellectual property of ImmuniWeb SA and must never be used for any commercial purposes without express written permission. Please report any violations to info@immuniweb.com

DNSSEC Configuration Test

DNSSEC (Domain Name System Security Extensions) is a security protocol that protects against DNS spoofing by ensuring the authenticity and integrity of DNS data.

Domain **official.id** has 1 unsigned DNS record of A type:

Type	Domain name	IP Address
A	official.id	216.198.79.1
